SUMMARY

Third-year Computer Science Engineering student at V.S.B Engineering College with practical exposure to real-world projects and professional work environments. Seeking an internship opportunity to apply technical knowledge, strengthen problem-solving skills, and contribute effectively to a dynamic team.

EDUCATION

B.E. in Computer Science Engineering

GPA: 8.3 / 10

V.S.B Engineering College (2023 – 2027)

Class 12th (HSC)

89%

Kalaimagal Hr. Sec. School (2023)

Class 10th (SSLC)

100%

Vidya Mandir Matric Hr. Sec. School (2021)

INTERNSHIP EXPERIENCE

Java Stack Developer Intern

Oct 2025 – Dec 2025

Infosys (Virtual Internship)

- Gaining hands-on experience in full-stack development using Spring Boot and React.js.
- Built a Budget Tracking System with JWT authentication and RESTful API design, applying industry best practices in backend architecture and frontend integration.

Full Stack Developer Intern

May 2024 – June 2024

Kaashiv InfoTech

- Completed a hands-on internship in an active IT environment.
- Worked on live project tasks involving Java and JavaScript, following industry software development workflows including code reviews, debugging, and version control practices.
- Contributed to small-scale web modules using basic PHP.

PROJECTS

Patient Care Management System

[GitHub Link](#)

- Designed a microservices-based healthcare management system using Java and Spring Boot, comprising five loosely coupled services: Patient, Auth, Billing, Analytics, and API Gateway.
- Implemented Apache Kafka for asynchronous event-driven communication between services, gRPC for high-performance synchronous inter-service calls, and JWT authentication for secure access control.
- Containerized each service using Docker to ensure deployment scalability and environment consistency.

Help Desk & Ticket Management System

[GitHub Link](#)

- Developed a full-stack Help Desk and Ticket Management System enabling users to raise, track, and resolve support tickets efficiently.
- Built a responsive frontend using React.js with role-based dashboards for Admin, Agent, and User roles.
- Implemented secure authentication and authorization using JWT and OAuth 2.0 (Google/GitHub login).
- Designed RESTful APIs with Spring Boot for ticket lifecycle management including creation, assignment, escalation, and resolution.
- Ensured secure and scalable architecture with token-based session handling and third-party authentication integration.

AI-Driven Budget Tracking System

[GitHub Link](#)

- Developed a full-stack budget tracking application using React.js and Spring Boot, implementing JWT-based authentication for secure access.
- Built RESTful APIs to manage income, expenses, and monthly summaries, and integrated frontend and backend using Axios with a modular and scalable architecture.

TECHNICAL & SOFT SKILLS

Languages: Java, JavaScript, C, SQL

Frameworks: React JS, Spring Boot

Platforms: Linux, Windows

Soft Skills: Hardworking and strategically driven individual with leadership skills, strong goal focus, and the ability to execute tasks efficiently.
